

# Correction

In the article entitled *Effectiveness of Capillary Electrophoresis Using Fluorescent-Labeled Primers in Detecting T-Cell Receptor  $\gamma$  Gene Rearrangements* (Volume 4, pages 137–143), the V2 primer sequence listed for fluorescent-labeled amplification was incorrectly given. The correct primer sequence is ACTCCAGGGTTGTGTTGGAATCA (note the deletion of an extra “G” nucleotide near the 3’ end). The data in the study were not affected by this typographical error.
